The left column lists the levels of the matrix - The right column lists the number of people you need to personally enroll to collect income from that level. You are auto-qualified for income from the first 3 levels before you enroll your first person. That's just one of the leverage principals built into the A-B-C System. The Crown Matrix works in exactly the same manner but pays you 20 times more money. Because the Matrix is 3 wide at the top and it takes 8 enrollments to qualify for all 11 levels of income 5 of the 8 must be placed down-line from the first three. Every enrollment placed by a down-line person goes into your matrix.
